

ABSTRACT

1           Apparatus,       methods       and       products       for  
2       monitoring/controlling a reciprocating well producing  
3       hydrocarbons from a wellbore, which determine the surface  
4       card from a well operating characteristics, determine the  
5       downhole card, and display both at the same scale for  
6       position.
